Subject: What Settlement? and why?

After all the time, energy and money wasted by DOJ, they tell us they were going to settle. Sounds fishy to me! Why doesn't Justice just admit they are gutless idiots. That's what they look like. I hope at least some of the Governors involved in this suit have the guts to finish this job that was started. Justice doesn't. If any body thinks that MSFT isn't a powerful monopoly, ask them what runs on their desk top.
